

## BUFFET TABLE

@SarahFlipsIt

# PROJECT PLAN

Skill Level: Beginner

# Materials

Item	Qty
Old piece of furniture	1
Frosting piping bag	1
Fine/medium grit sanding block	1
Gold leaf paint	1
Knobs	TBD
123 Zinsser Primer	
Cabinet paint in PPG Cool Concrete	
Casting Resin	
Construction adhesive/caulk gun	
7 inch Metal Furniture Legs	

# Tools Used

*Orbital Sander*

*Drill/Driver*

*Jigsaw*

*Multi-Tool*

## Also Needed: Detail Paint Brushes, Paint Sprayer

Battery Tip: A 4.0 Ah battery is recommended to be paired with high amp draw tools for maximum efficiency.

# Assembly Instructions

---

## Step 1

Select a buffet or entertainment center with a similar build to the Anthro Daniella Buffet piece. I found mine on Facebook Marketplace for \$20. The biggest thing to look for is flush drawers/cabinets, so you can draw the stems from top to bottom.

---

## Step 2

Remove hardware and sand down using 120-grit sandpaper. I decided to sand mine down completely, but you could probably get away with doing a quick scuff if you use a quality primer.

---

## Step 3

Blow off piece and wipe clean. Make sure the piece is free of dust, grease, and anything else on the surface.

---

## Step 4

Using a pencil, sketch out where your “stems” will go. I sketched mine out on a piece of paper to use as a reference while I drew on the piece.

---

## Step 5

Open joint compound and mix well. Scoop joint compound into piping bag, pushing out all air from the top. Cut tip so you have an opening about  $\frac{1}{4}$ ” long. Gently squeeze joint compound out while moving across the lines drawn on the piece.

---

## Step 6

Once dry, lightly sand imperfections from stems. I had to fill imperfections and sand again about 3 times, but it will just depend how perfect you want to try to get them.

---

## Step 7

Time to prime! I used a spray gun, but if you don't own a spray gun you can use a foam roller instead.

## Step 8

Paint. I did 2 coats, waiting 2 hours in between coats.

---

## Step 9

Count the number of stems and pour molds for flowers. You'll have to repeat this process quite a bit. I had 14 flowers, so I just poured flowers throughout the day.

---

## Step 10

Clip stems off flower molds.

---

## Step 11

Paint remaining flower stem and small details on flower (see video is there a link to the video?) using gold leaf paint.

---

## Step 12

Paint stems on piece using gold leaf paint. Be careful to only paint the stems!

---

## Step 13

Squeeze a small amount of construction adhesive on each flower and attach.

---

## Step 14

Paint knobs & legs using gold leaf paint to match.

---

## Step 15

Install knobs & legs.
