

HART

PALLET COMPOST AREA

@TheMustardSeed205

PROJECT PLAN

Skill Level: Beginner

Materials

Item	Qty
Pallets (if freestanding)*	5
Pallets (if building against existing structure)*	3
8' 2x4s cut in half	2
Metal fence posts or 4x4s	3
Chicken Wire	
Screws	

* Ensure pallets are the same size

Tools Used

Circ Saw

Driver

Stapler

Tape Measure

Level

Marker

Safety Glasses

Battery Tip: A 4.0 Ah battery is recommended to be paired with high amp draw tools for maximum efficiency.

Assembly Instructions

Step 1

If adding to an existing shed, make sure to cover it with waterproof material. We used reclaimed metal.

Step 2

Using long screws, attach 1 pallet to each end of the shed.

Step 3

To make the compost sturdier, add a metal fence post to the front of each pallet. You can use a 4x4 if you prefer a more finished look.

Step 4

Now attach the middle pallet.

Step 5

Using a staple gun, attach the chicken wire to all inside surfaces of the pallets to keep the refuse inside.

Step 6

Add front gates to enclose and you're done!
