

HART™

Bridal Shower Sign

From: @rusticrosehomestead

PROJECT PLAN

Finished Dimensions: Varies based on desired size

Skill Level: Beginner

Materials

Item	Qty
1 1/2 Pocket hole screws	3
Sand paper	
Stain/paint	
Paint marker OR cutting machine	1

Tools Used

Power Drill

Orbital Sander

Measuring Tape

Miter Saw

Marker

Also Needed: Clamps, Jig

Battery Tip: A 4.0 Ah battery is recommended to be paired with high amp draw tools for maximum efficiency.

Lumber Cut List

Board*	Description	Cut to	Qty
1" x 10"	Common Pine	36"	2

* Board dimensions are "nominal." Actual dimensions are smaller due to lumber industry standards. Cuts are actual length.

Assembly Instructions

Step 1

Grab your 1x10 and measure out how long you want your sign. For my sign, I did 30 inches.

Step 2

Cut your board at the desired length. Keep in mind, you want two pieces, so make sure you cut them small enough to have 2 of the same size pieces.

Step 3

Grab your jig and make three pocket holes in the BACK of ONE board

Step 4

Align your two boards on top of each other, face down.

Step 5

Grab 3 pocket hole screws and your drill then drill one screw into each hole.

Step 6

Now that your boards are attached, sand your boards down smooth. Pocket holes create a nice tight seam, so as you sand you will see that line disappear.

Step 7

Paint or stain your wood sign. For this project, I stained mine.

Step 8

Use your paint marker or cutting machine to cut/paint your desired design. For this project I used my cutting machine.

Step 9

Paint your design onto your board and you are done! Now you have a beautiful bridal sign that can also be used at the wedding and the bride can cherish forever!
